## WHAT WE DO

Ever since University for Man was conceived seven years ago, it has sought to make education an experience of curiosity and relevance for the learner. Education need not be perceived as endless labor leading only to the external rewards of a degree. Instead, it should be seen as a vigorous and joyful experience which results in the internal rewards of personal growth.

In UFM, no prerequisites are required; no grades are given. A person participates because he desires to know something which can help make living more fascinating.

Nothing exists unless it is shared. In the truest sense, knowledge comes into active existence within the UFM network. All courses are coordinated by individuals who volunteer their time and freely share their special skills or knowledge with others.

All who participate in UFM, whether "teacher" or "student", are learners. One of the best ways to learn more about something is to try to teach it to another.

Participants in UFM come from diverse backgrounds, have varied occupations, and live different lifestyles. Faculty wives, policemen, college students, grandmothers, M.D.'s, "street people", professors, and high school students are likely to be enrolled in any UFM course. University for Man is thus an on-going "town forum" for the KSU-Manhattan community.

## ACKNOWLEDGEMENTS

The staff of UFM expresses appreciation and extends thanks to the following organizations:

- (1) Student Governing Association, Kansas State University.
- (2) Division of Continuing Education, Kansas State University.
- (3) United Way, Manhattan chapter.

The concern and assistance of these groups enable UFM to provide a learning network of high quality, available for free to the participants.

Personal thanks are also extended to private individuals who have made generous contributions of money to UFM. Their donations come at a most crucial time in our history. We are expanding further into the community, attempting to provide a stronger and more vital program of education throughout the area. Their concerns, and the assistance of the Manhattan chapter of the United Way, are making this expansion possible. Again, thanks.

Others wishing to contribute may do so by designating checks to the Manhattan United Way or sending a tax-free (UFM is now non-profit incorporated) contribution to University for Man.

## WHO WE ARE

The members of the University for Man staff are a heterogeneous group. The integration of their different backgrounds and interests has created a work corps able to relate to nearly all of the diverse community that UFM serves.

From left to right, the staff members and their areas of responsibility are: Karen Slack, high school; Sue Sandmeyer, education, women, volunteers and services; Shelby Grimm, sports and environment; Sue Maes, spiritual awareness and interpersonal groups; Dennis Lofgren (with Spot), arts and crafts and fine arts; Carmen Chirveno, Douglass Center; Doris Hoerman (with Sham), politics and foods; Joe Rippetoe (with Mandy), community and scholarly endeavors. Missing from the group picture is our errant tomcat, Manhattan.

Thank you to two departing staff members, Stephanie Brock and Clif Castle, and to a great helper, Jim Killacky, for the assistance each has contributed to UFM's growth.

# COMMUNITY

This center is intended for the honorable senior citizens of the Manhattan community. A weekly program has been set up to provide recreation for those who no longer have to "slave away" at an 8 to 18 hour a day job. Planned activities such as films, bus tours, and special entertainment will spark the program throughout the months of activities. Please use your leisure time to join us every Tuesday for a covered dish dinner, card game, pool, or just plain visiting with friends. Let us entertain you once a week at the Community House, 4th and Humboldt.

Every Tuesday beginning October 16 (10:00 a.m. - 3:00 p.m.) bring a covered dish, your own table service, a big appetite and especially your friends. Plan to have FUN; the only requirement is that you must be of age (60 years or older). University for Man is working in cooperation with the Manhattan Recreation Commission. If you desire further information contact the Manhattan Recreation Office (776-4714) or University for Man (532-5866). COORDINATORS: Mary Alt, 539-6898 and Carmen Chirveno, 532-5866.

NOTE: Classes will also be held throughout the year at the High Rise for the Elderly. Times for these classes will be listed at a later date. COORDINATOR: Dola Mae Gordon. PHONE: 776-8588. Students from Manhattan High School will be helping with these classes.

## DEFENSIVE DRIVING

This is an eight-hour defensive driving course, designed to combat the mounting traffic death toll. It is developed by the National Safety Council and qualified instructors from the Kansas Farm Bureau will teach techniques of defensive driving. The class as a group will decide how to divide the eight hours into sessions. There is a minimum of 25 required to have the course, and materials cost only \$1. Sign up and you will be contacted. COORDINATOR: Delbert Ekart, Kansas Farm Bureau. PHONE: 539-2261.

## CABLE TV

Since there are a limited number of hours in a week, occasionally some UFM courses have time conflicts with other ones. There are also numerous individual reasons which preclude course participation. We are thus exploring the possibility of videotaping several of our most successful events for presentation through cable TV at a later date. This is a relatively new area so we are curious if anyone else in the community is also interested in preparing material for cable TV. If you want to explore the possibilities further with us, call Joe Rippetoe at UFM (532-5866) or write to us at 615 Fairchild Terrace.

## PERSPECTIVES ON KANSAS COMMUNITIES

This summer UFM began this course to provide a forum for persons involved in community projects or research to share their work or views with the rest of the community. The series this fall has expanded to include new resource persons and additional topics. Rather than relying solely on social scientists--as was the case this summer--this course has also drawn speakers from other areas, most notably the humanities. COORDINATOR: Joe Rippetoe. PHONE: UFM, 532-5866. TIME: 7:30 p.m. LOCATION: U.M.H.E. Center, 1021 Denison Avenue. Every Wednesday.

- October 3---"Changing Patterns of Kansas Land Use," Jan Flora, KSU sociology; Homer Socolofsky, KSU history.
- 10---"Extending Human Services to Rural Communities," E.R. Sinnett, KSU mental health; Sue Maes, Director of UFM; Steve Bollman, KSU family and child development.
- 17---"Urbanizing Kansas," Joseph Hawes, KSU history; Benjamin Tilghman, KSU philosophy; and the film "How to Look At a City."
- 24---"The Pottawatomis: Indians at St. Mary's," Frank Battese, Pottawatomis Indian Center at St. Mary's; Bill Koch, KSU English.
- 31---"The Aged in Manhattan," Hal Orbach and George Peters, KSU sociology.
- November 7---"Grassroots Citizen Action on Community Issues," Lou Douglas, KSU political science; Wayne Rohrer, KSU sociology.

There will be time for perhaps two or three additional sessions. The number and content of such sessions will be determined by the group. Additional speakers will also join us for the sessions described above.

# COMMUNITY

## DRUGS: HISTORY, FACTS, AND FICTION

We'll be learning together about any and all drugs the group is interested in--from the barbiturates (now the #1 drug problem in the nation) to caffeine and alcohol. PHONE: 539-0416. DATE: Thursday, October 4. TIME: 7:30 p.m. LOCATION: 1600 Laramie, upstairs. (Both coordinators are currently on the staff of the Drug Education Center).

## TELEPHONE PLEASE

The Deacons are sponsoring a telephone service for the Manhattan community for individuals living alone who would appreciate receiving a telephone call each day. Such a service has worked well in other communities. The purpose is a reassuring daily contact expressing concern for those who, seeking to care for themselves, need some regular contact. It is not intended that the person who telephones perform any other service, except in the case of emergency. If you can offer your time to make a telephone call, or would appreciate receiving such a service, call Telephone Please. COORDINATOR: Stanely Harris, First Presbyterian Church, 8th and Leavenworth. PHONE: 537-0518.

### MANHATTAN FOOD CO-OP

During spring and summer of this year, a group of people from the community have been realizing the benefits of buying food cooperatively. Food is bought in bulk quantities from a Manhattan wholesale food distributor, Great Plains Grain Co., local farm markets, Bit-O-Gold cheese factory, and members of the co-op who may have surplus garden vegetables. The produce is of excellent quality, and a large variety of grains, flours, seeds, cereals, oils, etc. is also available. Members volunteer their labor so that a great savings on food is possible.

Interested persons should stop by the UFM House at 615 Fairchild Terrace between the hours of 1-3 p.m. any Saturday. There will be people who will explain the operation of the food co-op and help you place an order. You may pick up information, including price lists, any time during the week. The more members, the greater assortment of food items you'll have to choose from.

# EDUCATION

## TEACHER'S RESOURCE DIRECTORY

There is a vast wealth of resources available to teachers in the Manhattan community - but how can we find out about them so that they can be utilized for classroom learning? This class is basically designed to help teachers discover those resource people. We have been hard at work compiling a card index of community residents who are willing to share their knowledge with school children. In this first and only meeting we would like to share the file with teachers, have teachers exchange information with us, and express their needs to us. Only with mutual effort will the file become complete. The file will be located at the UFM house, 615 Fairchild Terr. COORDINATOR: Bobbi Lynch PHONE: 539-9406 DATE: Thursday, Oct. 25 TIME: 7:00 LOCATION: UFM house, 615 Fairchild Terr. (Bobbi teaches 9th grade civics at Manhattan Jr. High, and is on the Board of Directors and chairman of City Gov't for the League of Women Voters).

## ALTERNATIVE EDUCATION

Teachers from two forms of alternative educational systems will be in Manhattan to share their philosophies and ideas with you. They are:

Teachers from the school will share Montessori philosophy and approaches through discussion, equipment, and slide show. COORDINATOR: Sharlet McClurkin DATE: Monday, Oct. 15 TIME: 10:30 LOCATION: Rm. 212, Union - KSU

## POSITIVE SELF-IMAGE WORKSHOP

Everyone (children) carries within them a mental blueprint or picture of themselves. We may not be conscious of it, but it exists, nevertheless. Our every emotion, our every action will be consistent with how we see ourselves. We will act and think like the type of people we visualize ourselves to be. Your self-image, then, is the foundation of your entire personality. It will determine your actions and your emotions - and your actions do, in turn, control your circumstance. Because of this, your actions and your circumstances will tend to verify and give proof of your self-image . . . setting up a vicious circle if the self-image is leading you to failure, or a pleasant circle if it is leading you to success. Come and learn more about your role as teacher and parent in developing a child's self-image - one of the most important mirrors a child carries with him. COORDINATORS: Positive-Self-Image Consultants, Conway Springs, Ks. DATE: Wed., Oct. 3 TIME: 10:30 LOCATION: Rm 212, Union.

## ENVIRONMENTAL EDUCATION

This class is designed to provide those involved with education, a series of participatory environmental and problem solving experiences. The 1st session: Activities - Blind Walk, Space Walk, Role Playing, Newspaper Mapping, Personal Space (territoriality). 2nd session: Dialogue/Discussion - Society and the Environment a.)behavior b.)politics c.)economics d.)community 3rd session: Environmental Education Models. COORDINATOR: Paul Gallis PHONE: 532-5953 DATE: Thursday, October 11 TIME: 7:30 LOCATION: 210 Seaton hall - KSU (Paul is in his 5th year of working with environmental education for the classroom teacher; has taught freshman and sophomore architecture at KSU).

## ED SERIES:

Our task in education is to teach children how to learn. But the children have been learning even before they come to us in the classroom. If we see learning as growth, we need to think about conditions that make growth meaningful and the ways in which we can help create those situations. All too often learning situations become clouded with unmeaningful learning. Kids become automatically turned off. This series will hopefully bring some innovative ideas into the classroom - to turn kids on - to learning.

### CREATIVE TEACHING

What is creative teaching? How is it discovered or uncovered? How do we enhance it in ourselves and our students, and how might we hinder it? Come and discuss ideas with us; we'll talk about problems and possible solutions. COORDINATOR: Richard Hause DATE: Oct. 3, Wednesday TIME: 7:30 LOCATION: UFM, 615 Fairchild Terrace (Dr. Hause has taught the creativity course at KSU for ten semesters, and has degrees in English, secondary education and curriculum and instruction).

### FUN WITH MATHEMATICS

The session for mathematics will be designed for parents and teachers who would like to observe methods of teaching the facts of arithmetic in a fun way. . . through demonstration, games, and discussion. COORDINATOR: Ray Kurtz DATE: Wednesday, Oct. 10 TIME: 7:30 LOCATION: UFM, 615 Fairchild Terrace (Dr. Kurtz believes that children can be taught the basic facts of addition, subtraction, multiplication and division within a pleasant setting. He teaches the mathematics methods classes at KSU for both graduates and undergraduate students).

### HUMANISTIC SOCIAL STUDIES

Children tend to rank social studies low on their lists of favorite subjects. Children can enjoy the hard work of finding answers to their questions - if they are their own questions - about the problems and joys they encounter in living and relating with other members of the human family. Plans to share ideas at this session about how interesting, challenging, worthwhile social studies activities can be started and kept going with a group of children. COORDINATOR: Harlin Trennepohl DATE: Oct. 17, Wednesday TIME: 7:30 LOCATION: UFM, 615 Fairchild Terrace (Dr. Trennepohl teaches the social studies methods classes at KSU).

### THE WORLD OF SCIENCE

An experiential approach to involving children and elementary teachers in science. Those attending will participate in one or more science activities which they can use in their classroom. A brief rationale for an active-orientation approach will be presented. COORDINATOR: Bob James DATE: Wednesday, Oct. 24 TIME: 7:30 LOCATION: UFM, 615 Fairchild Terrace (Dr. James teaches the science method courses at KSU and is involved in environmental education in the classroom).

### MOTIVATIONAL MEDIA

This course will discuss techniques that can be used to stimulate students through the use of instructional media. In order to help stimulate students many of the following topics will require that the students actually participate in the production of the instructional material. The topics to be discussed are as follows: Making films; Making slides and developing slides; Multimage presentations; Filmstrip kits; Slide-tape presentations; How to turn them on with commercial films. COORDINATOR: M. Calvano DATE: November 7, Wed. TIME: 7:30 to 9:30 LOCATION: Holton Hall, room 1 - KSU (Dr. Calvano recently completed doctoral requirements in the area of Educational Psychology-Instructional Technology. His interests include perception and its effects upon instructional media, imagery, and photography).

### CAN JOHNNY READ?

Reading is more than memorizing words - it involves developing curiosity, playing with ideas, thinking, feeling good about oneself, using one's body and one's senses, and expanding one's horizons. Let's look at the tough job the student faces and discuss how we can turn kids on to the world of reading. COORDINATOR: LaVisa Wilson DATE: Oct. 31, Wed. TIME: 7:30 LOCATION: UFM, 615 Fairchild Terr. (Dr. Wilson has taught in an infant day care and has taught kindergartners and 1st graders).

## EDUCATION

### DEVELOPING MATH CONCEPTS IN CHILDREN

Training as a mathematician has alerted me to a whole extra dimension in watching our 5 children grow. I want to share some simple ideas that will help anyone (even a math dropout!) foster math concepts in children of all ages. (One of my hints concerns babies of 2 months!) We will discuss games, inexpensive toys, activities with unrecognized math content. Parents and grandparents, big sisters, brothers, teachers, or future teachers are all very much welcome. COORDINATOR: Margaret Maxfield PHONE: 539-7124 DATE: October 2, Tues. TIME: 8:00pm LOCATION: 417 N. 17th

### EDUCATION FILM SERIES:

**NO REASON TO STAY** A look at the school dropout and what he drops out from. This film takes a deliberately biased look at today's educational system and how it fails, if it does, to give young people the preparation they need for adult life when school doors close behind them. DATE: Tuesday, Oct. 23 TIME: 11:30 and 3:30 LOCATION: Rm. 206 Holton Hall KSU

**SUMMERHILL** A visit to a school without fixed rules, where no one studies except as he wishes, and where each student is his own master. Summerhill, founded by A.S. Neil 40 years ago. In the film he explains his objectives, and from the activities of the children at work and play can be seen how his methods work. ## THE PHOTOGRAPHS

The pictures are from in and around Manhattan. Taken during the last several months, they are from the circus, the nearby flinthills, bridge construction on Highway K-177, and the Riley County Fair. No attempt was made to develop a visual theme this time.

However, independent of whatever merit (or lack of merit) the pictures have, the activity of taking them was personally very enriching. For example, before attempting to photograph the hills, I had never really seen how the clouds, passing by the sun, could change the appearance and weight of an entire hill or series of bluffs. As I photographed, I saw how the clouds would sometimes permit the sun to expose only a tip or a side, setting off the rest in dark contrast. And then, by the cloud moving on, another contrast would be defined and there soon stood a brand new kind of hill!

At the fair, I found the camera to be an excellent ticket for gaining entrance into the lives of individual carnival workers. I had a good talk with almost every carnie I photographed. Often they looked crude or rough. But appearances belied the character underneath. They were sensitive, kind, and especially considerate and careful of their fellow carnies. About the fair-goers: "Sure, they like to be teased. They expect it. They wouldn't come if they disliked it."

--Dennis Lofgren--
