MANHATTAN IN TRANSITION:

EXPLORING HUMAN VALUES AND PUBLIC POLICY

It's the business of the humanists to help us see the full range of choices, to set our sights on those things that enlighten the human condition, that lift and strengthen the human spirit, and thus to extend people's capacities to live together peacefully, compassionately, and with understanding. (Robert Goheen)

To ask the hard question, as W.H. Auden put it, is easy. But to ask the right question is not. Perhaps the simplest of all the right questions, and the most difficult to answer, is the question at the heart of humanistic study: not how or when or where...but Why. (William Shaefer)

The Kansas Committee for the Humanities

The Kansas Committee for the Humanities (KCH) is an independent group of citizens working in cooperation with the National Endowment for the Humanities, a federal agency created by Congress in 1965 and supported by public appropriations and private contributions.

The KCH state-based program provides an opportunity to bring together citi-

zens, public officials, and college and university teachers and other specialists from the fields of history, literature, philosophy, ethics, religion, law and related humanities perspectives to articulate values, priorities, cultural attitudes and traditions so that communities may be able to maintain and strengthen a sense of identity in the midst of inevitable growth and change.

SELF HEALTH CARE

Candace Bogart
539-3511 (103)
Sue Sandmeyer
539-8304

Women have long been denied proper medical attention. We have not learned enough about our bodies and often what we have been taught is vague or mythical. We need to know the facts about how our bodies work, to help us become more familiar with ourselves and to learn the language of the medical people to make the medical profession seem less mysterious and frightening. This is not a course as of yet . . . what we're wanting to do is begin a health care clinic - run by and for women. At this moment, we are trying to form an interest group of people who would be interested in getting the clinic under way. Please sign at registration and you'll be contacted as to a time when we will all meet to find a direction.

LEARNING EXCHANGE

At University for Man, we are constantly endeavoring to expand our philosophy and services to as many willing participants as possible. Realizing the diverse means by which people learn, we feel there is another method of sharing skills and interests besides through classes.

Therefore, UFM, in conjunction with the University Learning Network, has developed a Learning Exchange at KSU. A Learning Exchange symbolizes a new concept in education - that people have the knowledge, skills, talent, interests and tools that make for a dynamic exchange of learning between interested people. We also feel that most people are willing to share what they know with others, thus it becomes possible for learning teaching and sharing to be enjoyable as well as enlightening.

The Learning Exchange's function is reflected in its name - a proposed exchange of interests among members of the KSU-Manhattan community. It can be used to learn or teach a skill or craft, to find a tutor, to find a discussion group or a speaker. This summer, we sent out questionnaires to all the faculty and staff at KSU. The returns were numerous and encouraging - everything from acupuncture to barbed wire collecting to behavior mod.

To use the Learning Exchange, call ULN at 532-6442 & let them know what subject you want to learn, teach, or would like to speak on, or are interested in. If there is a person with a similar interest in their files, they'll give you that person's name & phone number and contact with that person will be left up to you.

WHAT WE DO & WHO WE ARE -

The main basis for what we do is the simple belief that in each and every community there are people who can teach and people who want to learn. With this in mind we endeavor to seek out these teachers and to develop learning situations for the pursuit of knowledge which are accessible to everyone. UFM is a medium for people to exchange all kinds of knowledge and information.

University for Man is a free university. The "free" here refers to the process of education. Our aim is the provision of human learning and active thinkers and doers rather than establishing citadels of elitism and loneliness which are very common in other educational institutions. Education should be an adventure which involves the total environment, occurring in a community in which every individual is a participant in the decisions which influence his/her existence. The free university attempts to help an individual's self-growth and augment a community's services. Titles such as "dropout", "professor", "Doctor", "housewife", are left behind as we become all common people wishing to learn and grow together in a spirit which will perpetuate a real sense of community.

In the pages of this brochure you will find a wide variety of offerings ranging from beekeeping to ballet. These two hundred or so events represent what University for Man is all about. We make every effort to meet the diverse needs present in the community by providing as broad a range of programs as possible and so we hope that everyone will find something of which they can be a part.

The course offerings are diverse as well as practical, innovative as well as useful, relaxing as well as stimulating. To reiterate, free u. courses reflect what people need, what they want to learn and what resources are available in the community. One could think of these courses in terms of three main categories under which the ten sections fall i.e. "skills", "awareness", and "academics". In the only authoritative work in this field (Bring Your Own Bag - A Report On Free Universities, 1971) our good friend Jane Lichtman tells us that in the 64 existing free u's across the country, half of all the courses offered are "skills" - the goal being the achievement of a specific ability. Twenty-five percent had to do with "academics" and less than a quarter concentrated on the attainment of new personnel insights - "awareness". UFM's current offerings include 47% "skills", 33% "awareness" and 24% "academics".

Where we will be or what we will offer in another six years or indeed another six months, is at best uncertain. Our main objective, in this regard, is to try to be constantly aware of where people's interest lie, and attempt to fulfill them. Consequently a great deal of our time is spent hunting out leaders for courses people request. For example someone asked us recently for a modern dance group. After some sleuthing through the People's Resource Directory and a local dance group, we found a person who was glad to offer such a course - and another person who wanted to offer "Sufi" a religious dance group. Other courses and ideas come from casual conversations, reading brochures from other free u's, conferences, people who volunteer to lead something and a large number of residents who constantly support our work.

The people who put these programs together are equally diverse and varied in background. We range from a high school student to a forty-five year old community worker. We have grown up in many different states and countries.

Since our last brochure some staff changes have occurred. In August Kathy Doran and Alan Norton departed to continue their studies elsewhere. These two had volunteered to work the summer with us and we miss them a lot - not only because of their outstandingly meticulous work, but also their kindness and unquestioned reliability. Art Elliot also left to pursue his career in architecture and his drole sense of humor is missed. Doug Hoseney, Shella Russell and Jani Sherrard are newcomers to the group. Doug is in charge of the high school program, Shella is primarily responsible for the excellent arts and crafts section and Jani is director of the Kansas Humanities grant project which will be of significant help in bringing greater understanding of various community issues during the coming months.

Thus in assembling this brochure we've selected a pictorial theme of UFM events and the people we serve. Perhaps you will recognize yourself or a friend from some of the photos. Thanks to George Kren and Stan Lewis for the use of part of their collections. In addition we want to say a special thank you to our good friends in the Division of Continuing Education who helped with the typing.

As we look to the year ahead we feel a sense of excitement and anticipation. We are in the process of assembling the necessary information for a community Learning Exchange. In October we will be presenting some programs at a national Free University Conference in Boulder. On November 6, we will present the Paul Winter Consort in a live performance on the K-State campus. On Sunday November 10, we will offer a day long program covering the various aspects of the nation's number one drug problem - ALCOHOL. Also in November we will continue our work in smaller communities by doing programs in Clay Center, Abilene, and Marysville. In the early part of the spring of '75 - we plan along with several K-State and community organizations to host a national Alternatives Conference dealing with education, lifestyles, families--and featuring several nationally known figures.

We are in the process of developing an Arts and Crafts Center at the Old Douglass School, 9th and Yuma. Thanks to our continued funding from the United Way one of our staff members will be working with educational and human service programs through the Douglass Community Center.

Each Wednesday, commencing September 18 at 6:30pm, UFM will be featured on Manhattan TV-2. During the coming months on our show we hope to feature a wide range of events from our brochure.

We have talked in this note about our classes, some of our ideas and ourselves. We have kept the most important point until last. In this day of soaring costs, times when a sense of skepticism and fledgling paranoia seem to be abroad in the land it is heartening to know that there are people in this community who support us like they do. We speak for us this fall, and the many others who in a thousand different ways - from bringing over a beer late at night as we try to put the brochure together to making financial contributions -- let us know that they believe in us and the work which is done here. Without these people University for Man would not exist and our lives would be much emptier. JK & SS
